LUND ARCHITECTURE SYMPOSIUM
8 MARCH 2023

**CELEBRATING
ARCHITECTURE:
ØRESUND IN THE
CONTEMPORARY**

2023 marks the year when the UIA World Congress Copenhagen event turns the Øresund Region into the epicenter of global debate on architecture's capacity to reimagine the transformation of societies into sustainable living. Celebrating this manifestation, which will commence on both sides of the Sound, LAS23 will utilize the New European Bauhaus' three concepts – sustainability, aesthetics, inclusion – as agents of transformation to mobilize an inquiry into the architecture of sustainable living.
